

Food Connect

FINE DINING SOLUTION

Since its incorporation in 1997, **Divergent Technologies Philippines, Inc.** has provided complete, customized, and integrated business and financial solutions for retail distributors and manufacturing companies.

A thriving food industry means new restaurants and cafés emerge at an unprecedented rate. How do businesses retain their market share, and stand out from the competition? Businesses rely on a specific kind of information to create plans for consistent improvement, and to arrive at effective business solutions.

PRODUCT MODULES AND FEATURES

Food Connect is an integrated food and beverage management system that connects separate aspects of restaurant business operations. It integrates the front-end cashier, the order station, the reception bar, the kitchen, and the back office via network computers.

Food Connect provides powerful communication capabilities, including communicating order messages to different locations, and real-time access to multiple terminals. **Food Connect** tracks cash flow analysis, financial reporting, manpower allocation, credit control, and other critical management reports to track the performance of your outlets.

The versatile reporting and back-end management function provides ultimate control. **Food Connect** produces high-quality management reports, tracks labor and inventory costs, and creates business analyses in back-office servers. These reports allow managers to create sound business decisions. All useful databases can be updated via the management module, including: food description, price, and billing method. **Food Connect** also has system security to protect user privacy and to prevent illegal entry.

These functions reduce paperwork, automate workflow, streamline daily administrative tasks, improve management, and aid in decision-making.

Businesses must identify and address customers' needs, create demand, and make effective and timely decisions quickly and accurately by analyzing sales, customer behavior, and labor productivity. A proficient food and beverage management system provides a complete, holistic, and integrated solution for restaurants, bars, food court stalls, and food-chain stores.

Food Connect minimizes operating costs while maximize profits. State-of-the-art and easy-to-use touch-screen devices improve the quality of service by simplifying and streamlining the processes of food ordering, bill-generation, and others, and reducing the potential for human error. Managers and business owners can therefore allocate more time to build closer relationships and cultivate business potential with stakeholders and both

Food Connect improves the speed and efficiency of service; eliminates human error to monitor shop sales and staff performance more efficiently; and simplifies the consolidation of sales figures.

The screenshot displays the 'NEW CHECKUP front end' interface. On the left is a grid of table numbers: 01-07, 08-14, 15-21, 22-28, 29-31, DELA, DELC, DELH, PUSH, and TK01-TK03. On the right is a control panel for 'TERMINAL NO. 1 CASHIER STATION DTPI SUPERVISOR' at 11:07 am on January 14, 2019. The panel includes buttons for Supervisor, Cash Flow, navigation arrows, Log Out, Exit, Floor Area, and a Table Guide legend. The legend defines colors for Open, Occupied, Bill Printed, Bill Out, Table Lock, and Consumption. The bottom status bar shows 'Runtime: NEW CHECKUP front end' and 'Modify ZOOM'.
